

BDI Now Offers SmartLUBE Solutions

BDI (Bearing Distributors, Inc.), headquartered in Cleveland, Ohio, announces a new line of solid lubricated products called SmartLUBE.

SmartLUBE, distributed exclusively by BDI, uses a patented solid lubricant material resulting in increased uptime and cost savings! SmartLUBE Solutions has proven results in normal applications with low running torque demands, vacuum applications, airborne or heavy contaminants, submerged, as well as applications with limited accessibility.

In addition to being environmentally friendly, SmartLUBE drastically reduces the chance of bearing failure in a production environment.

BDI is a leading industrial distributor to manufacturing companies throughout the world, with locations in the U.S., Canada, Mexico, Europe and Asia.
